

# AveryPro 43135 3.333 x 4 Rectangle Gutter Free Labels

## Page Layout Imposition

Imposition is an important design consideration. It's extremely helpful for the printer and the successful printing of your design when you provide the correct label size and positioning.

- 1** Size/Position: width = 4.000 height = 3.333 x-position = 0.656 y-position = 1.000
- 2** Position (2nd half of sheet): x-position = 9.156 y-position = 1.000
- 3** Step & Repeat Across: col = 2 h-offset = 4.188
- 4** Step & Repeat Down: row = 3 v-offset = 3.333

## Other Layout Considerations

Gutter-free product do not include print to the edge. Any element you want within a label should be moved inside and away from the label border. An 0.125 (1/8) inch internal margin is suggested for this product.

These full-page template dimensions are the same as the printer's final 12 x 18 sheet size. However, don't guess at what the printer may want from you. They may need to do their own imposition. Always check with your printer first.
